Tours Area - FRANCE

I am a passionate developer who loves to learn how to build new things. Figuring out how stuff works and using this knowledge to create new innovative projects is what I enjoy most.

Fast learner and determined worker, I work great in teams as well as on my own.

Experience

Deloitte - Cyber Risk Services

Full time employee: April 2016 - November 2017 - Amsterdam NETHERLANDS

Full-stack Developer : C# ASP .Net AngularJS

My role was to build and maintain solutions for ethical hackers. I came up with algorithms to handle and process huge amounts of complex data in the backend (API controllers and DB structure). In the frontend I built complex yet intuitive and visually pleasing views to display abstract objects. I also had to oversee the development of a project by leading a small team and coming up with work items, prioritizing and organizing tasks as well as hosting daily meetings.

Multivote

Internship : March 2014 - December 2014 - Bordeaux FRANCE

API Developer : Windows Azure C# ASP .Net

I created a number of APIs using Microsoft's Windows Azure tools and I optimized the computation time of large amount of polling data using those same tools. I designed a number of algorithms taking advantage of the cloud based architecture and the Azure tools at my disposal that would flawlessly process, interpret and store a huge amount of data in very little time and in the most optimized way possible.

Robert Boulin Hospital Center

Internship : August 2012 - December 2012 - Libourne FRANCE

Web Developer : HTML CSS PHP SQL

I created a website that would allow the user to view and manipulate lots of information concerning the data center and its Virtual Machines. The tool I designed allowed its user to speed up the data backing process by about 20%.

Skills

Main Courses

C/C++ Advanced Programming
Object Oriented Programming
Java and Android Programming
Unix System Programming
Web Security and Networking
Hacklab: Hands-on Hacking
System Administration
AI Machine Learning
Search Engine Optimization
Business Communication Skills

Languages

C, C++
C#, ASP, .NET
HTML5
CSS3
Javascript, jQuery, AngularJS
PHP
MySQL, SQLServer
Java Android
Python3

Tools & Platforms

IDEs and Softwares:
Visual Studio
Android Studio
Unity3D
Gimp, Photoshop
Git, SVN, TFS

OS:
Windows
Linux

Education

UCSD

When : December 2014 - July 2015
What : UPS Extension Student at the University of California San Diego

I followed very interesting and enriching courses. Some were very technical (Advanced Programming...etc) and others were more theoretical, such as Search Engine Optimization or Business Communication Skills.

{EPITECH.}

When : August 2011 - December 2016
What : IT Student : Master in Computer Science and Programming

Throughout my cursus at Epitech, I have learned a lot in the field of Computer Science. From Development to Project Management, my time in Epitech has proven to be extremely enriching and interesting.

Marmoutier

When : August 2008 - July 2011
What : High School Marmoutier : Baccalauréat S (Scientific) with honors

After having spent 6 years in Puerto-Rico, I came back to France to finish High School and graduate.
